## DETAILED ACTION

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 46 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 11-13 of U.S. Patent No. 6,129,756. Although the conflicting claims are not identical, they are not patentably distinct from each other. It should be noted that newly proposed claim 46 was not part of the original restriction requirement of the parent application. Claim 46 is considered to comprise subject matter similar to the elected claims in the parent application.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application

by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 37-42 are rejected under 35 U.S.C. 102(b) as being anticipated by Lunn, 5,476,506. As seen in Figures 4-5D, the graft system comprises a tubular graft component with first and second ends of larger diameter than the middle portion, a length adjustable middle (due to the bellows or pleats) and stents in both the first and second ends.

Claims 37-46 are rejected under 35 U.S.C. 102(e) as being anticipated by Fogarty, 6,123,722. As seen in Figures 3-4, The Fogarty graft system comprises a tubular graft component with first and second ends of larger diameter than the middle portion, a length adjustable middle and stents in both the first and second ends. It should be noted that the length adjustable middle can comprises both a bellows region (column 18, lines 48-55) or a telescoping region (as seen in the Figures).
